D. B. Wilson spent the first of the week in Memphis attending a meeting of the Mississippi River Levee Association. Mr. Wilson is president of the Fulton County Levee Board which he represented at the Memphis gathering. It is the purpose of this organization, if possible, to separate the river work from that of harbors and the like. The latter proves a veritable millstone around the neck of progressive river improvement, and it would be beneficial to both branches of the work if handled separately. The association has the support of a number of very prominent men, who were in attendance and encouraged the move.

A WORD ABOUT FULTON COUNTY'S FINANCES.

There will be a more definite report made at next April term of Fiscal Court, which is the end of our Fiscal year, and at which time all of taxes will have been collected, and I think there will be a deficit of approximately of \$25,000, which amount includes the old debt of about \$10,000 which if deducted from the amount above stated, and which is now against the county, will show that during the present administration, a debt of about \$9,000 has been created.

We have about 240 miles of road in Fulton county to be maintained by the county, which is an increase of about 30 miles during present administration, which alone accounts for an increase in expenditures of about \$1500, which costs about \$55 per mile to maintain a mile annually.

Now to maintain the 240 miles we have at \$55 per mile costs annually about \$13,000, to say nothing of installing culverts and constructing bridges, which added to this cost of keeping roads has exceeded for the past two years the amount of the road tax, which is approximately \$18,000.

The exact amount spent on roads and bridges from October 1914 to October 1915, was \$68,97, which exceeds the tax about \$5000, but of course some improvements were made which were permanent, town.

We spent \$1,185.61 on Parkway to Memphis Highway, which included culverts purchased and installed, grading and paving dirt, etc., we spent about \$900 on gravel road, which included widening road and repairing bridges, etc., we spent about \$280 on levees and ditches in various parts of the county; we built 4 concrete bridges at a cost of \$1200; we spent about \$500 repairing and constructing and installing bridges and culverts in various parts of the county, and we also spent about \$1500 for grading and about \$6000 for dragging and about \$3000 for work such as ship scraper work, and patch work in general, which which grading and dragging etc., as a matter of fact will have to be done annually, but most of the above mentioned items are permanent and will not have to be done over next year, so you see we have a chance next year to pay some on debt.

Also during the year 1914 several improvements and expenditures were made, which were of permanent nature, such as County Jail \$12,000, steel drains \$500, culvert pipes \$5,500, painting Court House and bridges \$300, seven steel beamed bridges on circle \$4000, nineteen concrete culverts \$2500, flooring for several steel bridges \$2500.

We are in debt, not because the annual expenses for caring for roads and bridges and general expenses of the county are so heavy, but because of the fact that during the year 1914 and this year we had to expend considerable amounts which we do not have to expend next year or the next and which if disbursed next year, and most of them will be, we will be able to pay most if not every cent we owe by December 1916.

The above statement was made for the purpose of giving the taxpayer an idea as to what was being done with his money and also to remind the fellow taxpayers that there are several roads in the county and that these things cost.

The Hon. A. O. Stanley, in his speech on good roads said: "You can not build roads, however advisable it may be, without money. To say that you are in favor of good roads, is like saying you are in favor of good health or good morals, good atmosphere, or good anything else. Anybody and a driveling fool, favors good roads, just as we favor good health or good weather. We all favor good roads who have sense enough to travel over them. The question is, not whether it is desirable to have better highways in Kentucky, but how we shall obtain them. We all want them if we can afford them, because we must buy and pay for these roads ourselves."

E. J. STAHL,
County Judge
